

GAS BOTTLE HOLDERS

Torchmaster Australia introduces you to a fully adjustable powder coated aluminium track and bracket system.

Can be used to safely secure:

- Gas/Oxy Bottles
- Fire Extinguishers
- Ladders
- Fuel Drums
- Surf Boards
- Kayaks
- and much more...

Easily installed in:

- Workshops
- Boats
- Utes/Trucks/Vans
- Caravans/ Motor Homes
- Homes
- Tractors

HELPFUL TIPS

If gas bottle restraints are needed for tall cylinders, that is more than 1 metre high, then the following has to be considered:

- If the restraint is for a gas cylinder in a warehouse/storage wall, and is stationary, then 1 set of restraint will suffice.
- If the restraint is used for gas cylinders to be fixed to the back of a moving vehicle, then for safety purpose, 2 sets are needed. One set about 1/3 way off the ground and another one 2/3 from the top. This is to ensure maximum security due the weight of the cylinders on a moving vehicle.

Strap size Calculator.

To ensure that the straps are suitable length for your cylinder, here is a simple calculation.

Example:

Size of Gas Bottle	Diameter of Bottle	Strap size needed as a minimum
E size cylinder	210mm	65mm

Go to: <https://www.omnicalculator.com/math/cylinder-circumference>

The above web site will help you to work out other size straps needed for different size gas cylinders

INDIVIDUAL BRACKETS

Stock Code	Product Description	Pack Size
J103	1 x Set Curved Brackets + 600mm Strap (Small)	1
J105	1 x Set Curved Brackets + 900mm Strap (Medium)	1
J107	1 x Set Curved Brackets + 1200mm Strap (Large)	1

ACCESSORIES

Stock Code	Product Description	Pack Size
