XR9581A True Vision Helmet, Black

Specifications

Item Model	XR9581A
Welding Filter Model	YXE-9581 PRO (True Colour)
Viewing Area	9.8 x 8.7cm
Outer Lens	XR750 - 13.8 x 11.8cm
Inner Lens	XR760 - 10.5 x 9.2cm
Grinding Function	Yes, Internal
Shade State	DIN4/ 5-8/ 9-13
Shade Control	Internal Stepless Variable
Sensitivity Control	Internal Stepless Variable
Arc Sensor	4
Battery Replaceable	1 x CR2450
Warranty	24 Months

XR938H/BK True Vision Black 4 Sensors

Specifications

Item Model	XR938H/BK
Welding Filter Model	YXE-858E PRO (True Colour)
Viewing Area	10 x 6cm
Outer Lens	XR720 - 11.5 x 10.4cm
Inner Lens	XR710 - 10 x 6.3cm
Grinding Function	Yes, External
Shade State	DIN4/ 5-8/ 9-13
Shade Control	External Stepless Variable
Sensitivity Control	External Stepless Variable
Arc Sensor	4
Battery Replaceable	1 x CR2450
Warranty	24 Months

TECHNICAL DATA

Viewing Area	10 x 5.3cm / 3.94" x 2.08"
Cartridge Size	11cm x 9cm / 4.33" x 3.54"
Up/IRE Protection	Permanent Shade DIN16
Light State	DIN Shade 4
Dark State	DIN Shade 5 to 13 Variable
Power Supply	Built in solar cells with replaceable batteries
Power On/Off	Fully Automatic
Switching Time Light to dark	1/30,000 seconds
Dark to Light	0.1-1.0 seconds (External variable)
Operating Temp	-10°C to +60°C (14°F to 140°F)
Storage Temp	-20°C to +70°C (-4°F to -158°F)
Helmet Material	High Impact Polyamide Nylon
Total Weight	470g
Minimum Amperage Required	5A

FEATURES

- True colour lens
- Slim and lightweight
- Automatic light adjustment from light to dark in 1/30,000th of a second
- Shade control from DIN 5-13
- Variable sensitivity
- Grinding mode
- Variable delay
- Viewing area 10 x 5.3cm (3.94" x 2.08")
- Full face coverage
- Suitable for TIG welding
- Automatic power on/off
- Battery life expectancy 2 years
- UV/IR protection up to shade DIN 16
- 14 months warranty
- Outer Lens - XR720 - 11.5x 10.4cm
- Outer Lens - XR730 - 10.5 x 5.8cm

**WELDING CURTAIN**

- Screens are made with a specially formulated vinyl to 0.4mm thick.
- These screens are transparent and resistant to UV rays, flame and abrasion all vinyl screen edges are hemmed with Dupont KEVLAR® Stitching.
- All ends have press studs at 30cm intervals.
- Red and Green Screens have been tested and pass test standards AS/NZS 3957:2014.
- The curtain frames are on rollers which provide lightweight solution for portable protection of workers and equipment.
- Helps to protect the surroundings from flying debris, sparks and harmful UV rays and radiation.

OMESF1050 Fibreglass Welding Blanket 1.0x50m roll (HT800)

HT800 - fibreglass blanket is used widely as a welding blanket and an insulation fabric to protect sensitive applications.

Material is treated with a satin weave pattern, designed for heat dispersion and protection against sparks.

Temperature rating is 550°C
Not for exposure to naked flame.
Comply to Australian Standard AS-3504.

APLB1818

High Silica Fabric for Higher Temperature Range Protection

SLF84 and SLF88 are High Silica Fabric, which have the qualities of high temperature resistance and anti-oxidation.

Due to its low thermal conductivity and thermal resistance, it is widely used in high temperature electrical insulation and other hazardous fields.

CHROME LEATHER WELDING BLANKET

Stock Code	Product Description	Pack Size
APLB1818	Chrome Leather Welding Blanket 1.8 x 1.8m 55°C	1

Maximum working temperature is up to 1600°C and at 1000°C and can be used continuously for long periods and performance is consistently high.

The fabrics are suitable for industrial sectors including metallurgy, rockets, aircraft, shipbuilding, automotive, nuclear power, and machinery.

As a high temperature welding blanket and screens, both thermal and mechanical increases the operational safety of industrial facilities and protection of equipment.
