9 HSGS-LD1	Heat Shield Large Diameter			

Gas Saver Consumables provide the user with a clear view of the welding operation without the obstruction of a traditional ceramic nozzle.

WEDGE COLLET SYSTEM

Ensures reliable clamping of the electrode without the risk of twisting, and can also be used with conventional collet bodies.

COMPACT GAS LENS ASSEMBLY

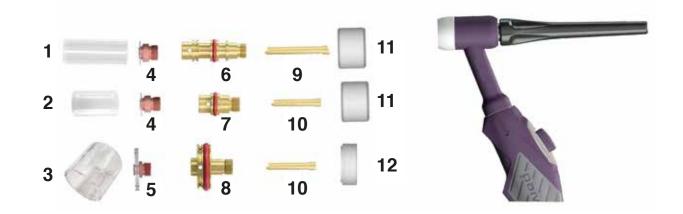

Improves gas coverage and allows gas flow to be reduced.

OMETPF01KIT

Excellent value for combination Tig Pen and Tig Finger 01.

OMETPF01KIT

TIG PEN:

This handy Tig Pen is used as a Welding Rod Holder for welding with any wire 1.0mm to 3.2mm.

This pen-like device helps to feed Tig filler rod. The Tig filler is inserted from the rear and then the wire is advanced by rolling the wheel with the tip of the index fingers.

End result is a smooth wire feeder and minimise waste of filler wire.

Tig FINGER 01:

Product is produced by fibreglass yarn.

OMETF01 has 200tex fibreglass yarn. Weave is 108pc of yarn.

OMETF02 has 350tex fibreglass yarn. Weave is 108pc of yarn.

The thicker yarn results in thicker and larger inner diameter. The thickness acts like an armour in the protection of the finger.

Working temperature is 550°C which helps the work at more extreme welding environment.

Torchmaster Australia is no way affiliated with any brands, trademark and manufacturers listed in our catalogue. All brands, trademarks and part numbers are the property of their respective owners. They are listed purely for customer convenience.

We carry a large range of Tig torches, parts and accessories. Some of our tig torches are imported completely built or they can be custom built locally to suit all your Tig welding applications.

No job is too small.

From the traditional tig torches to the new Pro-Grip Ergo Tig range, there will be a quality Tig Torch which will give you the best performance.
